Coordinator, INBAR

Mr. Xuan Taotao
Director, Anji
Bamboo Academy,
China

Dr. Paul Osei-
Tutu
Lecturer, KNUST,
Ghana

Energy and environment are the two major concerns in today's world. Bamboo, a woody biomass with the annual harvesting possibility, has proven potential for its application as a fuel in solid, liquid and gas forms. This session will focus on different enterprise models and associated technologies that can provide socio-economic and environmental benefits to smallholders.
